AMENDMENT AFTER FINAL ACTION

Commissioner for Patents  
PO Box 1450  
Alexandria, VA 22313-1450

Sir:

This is in response to the Final Official Action dated March 29, 2004.

Please extend the time by one month to respond to the last Office Action and charge  
the fee in the amount of \$55 to account #500716.

Please amend the above-identified application as follows:

Veach  
10/004,933

This configuration of the brake lights at the front of the vehicle is an important aspect of the present invention. By having an "inverted" triangle (ie, the point down) in the front of the vehicle, it is possible to note from a distance at night, especially, which direction the vehicle is traveling. In typical rear brake light systems, it is to be noted, the brake light is at a "point" of the triangle above the remaining brake lights.

Presumably, the Examiner searched for this feature which appears in the claims and was unable to find such a feature in the art. This fact alone should suggest the unobviousness of the improvement.

In order to narrow the claimed subject matter to this feature of this invention, it is proposed to amend claim 1 to recite that the third enclosure is positioned below and between the headlight assemblies. This language is taken from claim 12. The claim already recites that a triangle is formed when viewed from the front of the vehicle.

All remaining claims would be canceled.

The Examiner is requested to call the undersigned or Mr. Kroll if further changes are required to obtain allowance of the application.

A favorable action is solicited.

Respectfully submitted,

LEONARD BELKIN
